

AP-192

ROCK-SHAPED GARDEN SPEAKER

Colour: GREEN (STONE like)

The rock-shaped garden speaker **AP-192** has been designed to be installed in an open air environment. It is resistant to water, dampness, heat, etc.

Its design as well as its "rock-shaped" finish harmonize with all natural environments, which makes it specially indicated to be installed in gardens, hotels, campsites, sports facilities, theme parks, etc.

RECOMMENDED INSTALLATION METHOD:

In any case, safety rules according to the legal requirements and standards in each country should be taken into account during the installation.

1.- Audio line of the amplifier:

Make sure that the lead used for the connection is adequately protected against the conditions in which the loudspeaker is going to be used (low-tube, anti-humidity, etc).

2.- Connection:

Connect, using terminals, the leads of the loudspeaker and the audio line coming from the amplifier. Use a stagnant connection box with an adequate protection level (IP-55 or higher).

Polarity and the wanted power selection must be taken into account (see the table).

You must leave isolated the unused led of the speaker (in the third terminal).

3.- Place the loudspeaker in its emplacement:

The **AP-192** speaker must be fixed on the ground (concrete base, etc) using three screws (M8), according to the indicated anchorage trace or an analogous method.
